

YOUSEF BAHATHIQ

PharmD Intern | Pharma Industry Trained at Jamjoom Pharma | Open to Medical Representative Roles

youssef.bq1@gmail.com | +966 56 436 0576 | Jeddah, Saudi Arabia | yousefbahathiq.com | linkedin.com/in/yousef-bahathiq

PROFILE

Doctor of Pharmacy (PharmD) intern at Umm Al-Qura University, trained across pharmaceutical industry, hospital, and community pharmacy settings. Completed a 21-day rotation at Jamjoom Pharma Academy covering sales and presentation skills, manufacturing operations, and medical representative field visits to physicians. First-place winner of the Research Innovation & Excellence Award as data and statistical analyst on a four-year analysis of 1,835 medication-error reports.

EDUCATION

Doctor of Pharmacy (PharmD) - Umm Al-Qura University, Makkah

2020 - 2027

GPA: Excellent

PHARMACEUTICAL INDUSTRY EXPERIENCE

Jamjoom Pharma Academy - PharmD Intern (21-day rotation)

Sep 2026

- Sales & presentation training: in a product sales role-play, won over an initially resistant evaluator using a mock product website.
- Manufacturing exposure: toured 7 departments - HSE, Supply Chain, QA, QC, Production, and R&D (Formulation & Analytical Method Development).
- Field experience: joined a medical representative on physician visits across multiple specialties, mostly consultants.

AWARDS & HONORS

Research Innovation & Excellence Award - 1st Place

June 2026

College of Pharmacy, Umm Al-Qura University

- Awarded for "Medication Errors in the Emergency and Intensive Care Departments at Al-Noor Specialist Hospital, Makkah: A Four-Year Retrospective Analysis (2022-2025)."

RESEARCH EXPERIENCE

Medication Errors in Emergency & Intensive Care - Retrospective Analysis

2022 - 2025

Al-Noor Specialist Hospital, Makkah · Award-winning research project

- Data & statistical analyst in a five-member team analysing 1,835 medication-error reports over four years.
- Cleaned and standardized the dataset, consolidating 800+ drug-name variants into under 200.
- Ran the analysis in SPSS. Key finding: pharmacists detected 97.8% of reported errors; 92.7% never reached the patient.
